ELECTRICAL & INSTRUMENTATION ENGINEERS

For our client EGEMIN, an international automation company with its headquarter in Belgium, we are recruiting Electrical and Instrumentation Engineers (E&I engineers). The company employs over 800 people, the most of them based in Belgium.

Position

The engineers will work on several projects in the chemical-and petrochemical industry.

The E&I engineer (Electrical and Instrumentation engineer) is working most of the time in multidisciplinary projects. Depending of his experience he/she will work independently, as leader or as collaborator in a project. The projects include design and coordination of the implementation as well as testing.

We will support you during your relocation from Spain to Belgium:

- You will have a contract with our customer before leaving Spain
- Intensive Dutch language training will be provided in SEVILLA (Spain)
- We offer support during your integration in Belgium
- We will support you in finding adequate housing for your arrival in Belgium

IMPORTANT

- The candidate must have a **min of 1 year of experience in the pharmaceutical industry**
- Experience into the chemical or petrochemical industry
- Experience with CAD-systems, as E-plan or Autoplant
- Knowledge of processes, piping and electrical design
- Knowledge of PLC and/or DCS is a plus
- Good knowledge of English
- Other languages as French, German or Dutch are a plus

If you think your profile can fit with what we are looking for, please, let us know by sending us your CV in English and Word format to rf@bovara.eu.

For organizational reasons, note down in subject: CV E&I Engineer.
Thanks.
